

Learners in MLOPS module

Me waiting till the last minute to do everything then being shocked that I don't have enough time

ML Model performing well against the test set

The moment it enters the real world

AGENDA

-> Discuss how to avoid 1000s of hours of torture.

Data Science Lead: I'm sure you tracked all the ML experiments you ran in your last assignment, right?

What does model governance involve in a machine learning project?

10 users have participated

- ☐ A Only deploying the best model for user access 0%
- ☐ B Ensuring that project code is well documented 0%
- ☒ C Tracking the experiment from the experimentation to deployment for auditing purposes 100%
- ☐ D Reducing the data required for training the model 0%

Why is it important to keep track of data in machine learning projects?

0 users have participated

- ☐ A Data is the code that makes machine learning models work 0%
- ☐ B Data can be sourced from multiple storage units 0%
- ☐ C Data helps in analyzing features at different steps of the project 0%
- ☒ D All of the above 0%
